

# Artificial Intelligence in Applied Sciences

Volume: 2 – Issue No: 1 (January 2026)

## CONTENTS

**1** Mehmet Aziz Çakmak, Emrah Aslan, Yılmaz Demirhan, Fevzi Esen, Fatma Kantaş Yılmaz

---

A Genetic Algorithm-Based Traffic Light Optimization Model for Efficient Home Healthcare Service Delivery in Türkiye (Research Article)

**8** Sifeu Takougang Kingni, Said Baawain

---

Comparative Evaluation of Convolutional Neural Network Architectures for Automated Skin Cancer Classification: A Study on the ISIC 2018 Dataset (Research Article)

**15** Prachi Chhabra, Sukhendra Singh, Tathagat Banerjee

---

Hawk-Swarmception Segmentation Network (HSCS-Net): Enhanced Liver Tumor Segmentation with Receptive Field Optimization and Clinical Data-Guided Feature Selection via PSO and GWO (Research Article)

**27** Seda Bayat Toksoz, Gultekin Isik

---

A Comparative Evaluation of QLoRA and AdaLoRA for Parameter-Efficient Fine-Tuning of Large Language Models on Medical Textbook Question Answering (Research Article)

**32** Furkan Sönmez, Fevzi Das

---

Bridging the Gap Between Theoretical Performance and Clinical Utility in Multi-Class Skin Lesion Diagnosis (Research Article)

**37** Türker Berk Dönmez, Mustafa Kutlu, Chris Freeman

---

Predicting Upper Respiratory Tract Infections: The Role of Weather Data and Explainable AI (Research Article)
